

Hellenion Calendar 2020

Το Ημερολόγιο του Ελλήνιον 2020

**THIS CALENDAR** is the working calendar of Hellenion, a diverse group of Hellenic polytheists sharing the common goal of living a life of piety and proper respect for the Gods of Olympos and ancient Hellenic tradition.

The calendar is based on the monthly and annual observances and festivals of the ancient Athenians from about 800 BCE to 323 BCE. This version was created using information derived from two astronomical associations, <http://eclipse.gsfc.nasa.gov/SKYCAL/SKYCAL.html?cal=2020#skycal> and from [www.timeanddate.com/calendar/moonphases.html](http://www.timeanddate.com/calendar/moonphases.html), as well as these sources:

*Greek Religion* by Walter Burkert (Harvard University Press, 1977, English translation: Basil Blackwell Publisher and Harvard University Press, 1985),

*Old Stones, New Temples; ancient Greek paganism reborn*, by Drew Campbell (Xlibris Corporation, 2000),

*Festivals of the Athenians*, by H. W. Parke (London, Thames and Hudson, 1977)

Hellenic Month Established Per Athens (HMEPA). See the relevant pages at <http://www.numachi.com/~ccount/hmepa/calendars/699.html> for the 699th Olympiad.

One of our associated projects, the online version of this calendar, is now available at the Hellenion web site: <http://www.hellenion.org>. That version contains links to descriptions of all the special days noted on this calendar and suggestions about how to observe them in the 21st century. You are under **no** obligation to observe all the occasions and days mentioned here; in fact, that would be all but impossible at present, since none of us live in a wholly polytheistic city. Every observance is *optional*. This calendar is made available to you as a learning tool, and as a framework to begin or extend your practice of ancient Hellenic religious tradition. Needless to say, ancient Hellenic religion involved many more practices than are implied by this calendar, which is adapted to the modern secular calendar.

The calendar outlines ancient monthly practices, such as Hekate's Deipnon, Noumenia (the visible crescent moon) and the Agathos Daimon. It also lists ancient Athenian festivals on the exact dates where these are known. Where the exact date has not been revealed by research, a question mark follows the name of the festival. Information about the specific observance can be found in the references mentioned above and on the online version.

In addition to ancient festivals and observances, certain modern occasions are listed as well. This includes the Hellenion monthly libation (ensuring that at least one day a month is shared by the community, albeit scattered, at the same time, and also ensuring that each of the twelve Olympians is honored at least once during the year). Note that this libation is not an official practice of Hellenion but a voluntary activity endorsed by many Hellenion members. Some modern festivals are also listed, such as Heliogenna in December, and Prometheia, held in Greece near the summer solstice near Mt. Olympos. At the time of creating this calendar, the exact 2019 dates were not available. (More information about this festival is found at <https://prometheia.wordpress.com> ).

Remember that, among the ancient Greeks, **the day begins at sundown of the previous day**. Days in gray indicate the new moon/beginning of Greek month and the Hellenion monthly libation date. The dark of the moon is an approximation based on the Eastern Time Zone (based in Toronto, Ontario) and the exact time of dark of moon and Noumenia varies in other locations depending on your time zone, where in the time zone you live and your latitude.

Transliteration of Greek month names and festivals below used “y” to represent the short “u” of Greek, “kh” is used to represent “chi” (χ), a sound which does not exist in English, and “e” represents both epsilon (ε) and eta (η). **Ἐρωσο!**

*About the cover: Kylix of Apollo recovered from a burial in Delphoi, made about 480-470 BCE in an Attic workshop. Apollo is shown with an elaborate hair style and a wreath, a red cloak and his seven-string lyre. In his right hand, he holds a phiale (libation vessel) and he's attended by a black crow or raven, both associated with the god in myth. The photographer of this piece, Hellenion member Spyros Parashis, wonders, "If it is Apollo who is depicted, why is he pouring a libation? To whom does a god need to pour a libation?" What do you think? Why would a god need to pour a libation? Photo by Spyros Parashis, October 2019. Graphic design by K.M. Wehrstein.*
